V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	12, 15, 17	YES
	Claims	1-11, 13, 14, 16, 18, 19	NO
Inventive step (IS)	Claims		YES
	Claims	12, 15, 17	NO
Industrial applicability (IA)	Claims	1-19	YES
	Claims		NO

2. Citations and explanations

1. In the light of DE-A-196 44 615 (D1), the subject matter of Claims 1-11, 13, 14, 16, 18 and 19 cannot be considered novel (PCT Article 33(2)).

D1 has already disclosed aqueous coating compounds, formed of two constituents and used, in particular in the automotive industry, as electro-conductive primer coats on plastic substrates; said coating compounds comprise exactly the same components as those of the present Claim 1, i.e. polyols, conductive pigments, organic solvents such as xylol, toluol, mesityls or benzyl alcohol and also polyisocyanates - see Claims 1-6; column 1, lines 3-14; column 3, lines 2-54, column 4, lines 10-14 and lines 40-58, column 5, lines 26-67; column 6, lines 32-68. The (chlorinated) polyolefines additionally contained in the coating compounds according to D1 are likewise encompassed by the loosely worded present Claim 1 ("hydroprimer containing..." and the two instances of "constituents containing...").

2. Although the additional features of the dependent Claims 12, 15 and 17 are not disclosed in D1, said features appear to concern conventional measures in the field of coating compounds, which the person skilled in the art would choose, without thereby being inventive, in order to devise further hydroprimers or multi-coat finishes. Said claims do not therefore involve an inventive step (PCT Article 33(3)).
